

January 20, 1995

exhausted the number of bills that are currently...that were currently sitting on General File. It's my understanding that some of the committees that have had hearings the last couple of days have voted to advance some bills, and some of those, the paperwork might be ready to be reported. If we get those put up on the desk prior to adjournment today then they will be on Monday's agenda for floor debate. So we're going to, with the permission of the body, we will be standing at ease until we get some of those reported in so that we can have a work product on Monday. There will be no more business being transacted this morning, though, so individuals that have other things to do can wander away. Just that some time during the day we'll need at least one member left here to file a motion for adjournment. But that's the game plan as of this moment. On Monday, hopefully, we'll be having...we might be able to get some of these bills that were advanced today, particularly with the excellent work of our new E & R Chair I'm sure things will be speeding up there. We might get some of those reported back and be able to debate those again on Monday. And some of the bills that, hopefully, will be coming in from committee will be able to get on the agenda. So that's the plan.

PRESIDENT ROBAK: Thank you, Senator Withem. The Chair recognizes Senator Hall.

SENATOR HALL: Thank you, Madam President. Just for a point of order, if I could, what I'd like to do is since we're going to stand at ease, I'd like to have the Reference Committee meet now, or at least at ten-thirty, if we could, in Room 2102. That's about ten minutes, a little less. We'll go ahead and reference...deal with the Reference Report that you were given this morning, and we can probably finish that even before we adjourn, so those bills can be reported out very likely. If that's not a problem, I'd like to ask those members to meet in 2102 in about seven or eight minutes. Thank you, Madam President.

PRESIDENT ROBAK: Thank you, Senator Hall. The body is standing at ease.

EASE

PRESIDENT ROBAK: Mr. Clerk.

CLERK: Madam President, committee reports. Health and Human
